MUKESH PATEL SCHOOL OF TECHNOLOGY MANAGEMENT & ENGINEERING

Abhijit Borse
B-Tech Computer Science and Batch-2027
Date of Birth: 01-10-2004

Education

MPSTME, NMIMS University **2023 - 2027**
B. Tech in Computer Science
CGPA: 7.5/10

Junior Science College **2022**
HSC: 88.83 %

R.C.Patel Secondary School **2020**
SSC: 90.50%

Projects

AI Scategorizer – AI-Powered Intelligent Document Management System

It is an AI-powered document management system for multilingual document processing, classification, and retrieval. Integrated **OCR** for scanned and handwritten documents in English and Hindi, **semantic search using vector embeddings**, and AI-driven departmental routing. Implemented **real-time notifications** using WebSockets and email, **JWT-based authentication with RBAC**, and an analytics dashboard for monitoring document activity.

EcoTrack - Vehicle Emission Monitoring & Green points Platform

Developed **EcoTrack**, a sustainability-focused web platform that monitors vehicle carbon emissions and promotes eco-friendly behaviour through a Green Points reward system. Built with **React.js, HTML, and CSS** for the frontend and **Node.js** for backend logic, the system includes an odometer image upload module using **Python with TensorFlow/OCR** to extract travel distance. A carbon emission engine calculates emissions based on vehicle model, fuel type, and distance, with data stored in **MongoDB**. The platform also features an eco-activity recommendation system, a rewards mechanism for sustainable actions, and an analytics dashboard to track emissions, user progress, and environmental impact, with version control managed using **Git**.

ProductPath – Intelligent Product Navigation System

Developed a smart **Product Navigation System** to help users efficiently locate products within large infrastructures such as malls and supermarkets. Built using **React.js, HTML, and CSS** for the frontend and **Node.js with JavaScript** for backend functionality, the system uses a centralized **MongoDB** database to manage product inventory, store locations, floor mapping, and section categorization. It features advanced search and filtering options based on name, brand, category, colour, or size, along with real-time inventory updates to reflect product availability after purchases. An admin dashboard was also developed for inventory management and analytics monitoring, with version control handled using **Git**.

Certifications & Publications

- **"Deception in the Era of Artificially Intelligent Lies: Manufacturing Fake News Detection"** -Research paper accepted at International Conference on Intelligent Technologies for a Sustainable and Inclusive Future **(ICITSIF 2026)** (IEEE Indore).
- **Java Programming Certificate** – SkillUp

CORE SKILLS

- **Technical Skills** : Java, JavaScript, React.js, Node.js, HTML, CSS, SQL, MongoDB, Git, TensorFlow, IoT Development.
- **Soft Skills:** Analytical, Adaptable, Innovative, Collaborative, Communicative, Proactive, Disciplined.

Achievements and Positions of Responsibility

- **Mr. Personality Award**, Freshers 2023 – MPSTME, NMIMS University.
- **Gold Medalist (Chess)** – Inter-College Competition, MPSTME.
- **Main Stage Anchor** – Freshers 2024, Protsahan 2024 & Alumni Meet, MPSTME, NMIMS University.
